

GIRAFFES

Af Xirriquiteula Teatre

© Xirriquiteula

Two giraffes and their youngster stroll through the city accompanied with the music that playfully recreate a dreamlike, savannah atmosphere. Spectacular, visual, with no set script, these delightful denizens silently advance, communicating and connecting with the public they encounter or take by surprise.

This proposal suggests another way of seeing the city or any other space, through the ingenious, curious gaze of this gentle giraffe family.
