Ponten Pie is a company created and directed by the actor Sergi Ots.

The company was born as a platform for this artist to carry out personal projects related to the performing arts, thus having a personal and independent space for creation.

Ponten Pie was born with the objective of seeking unusual and different interpretation and staging in its projects, trying to reach the audience in a particular way by directly involving them in the story they are witnessing. Under the authorship of his own creations, the powerful visual aesthetics in their settings work in a very detailed way. In the same sense, they seek in the actors a particular truth, in the text as well as in the body, turning each piece into a real and authentic small world. The style of their projects, where various theatre disciplines combine, has been designated as one of the new theatrical languages.

STATUS

Producent af internationale turneproduktioner
